**Associate Science Degree—Mechanical Engineering**, Pennsylvania State University

**Experience**

I have been providing counseling services to adult clients in a variety of treatment settings since 1989. I have also developed and presented numerous wellness workshops, as well as authoring wellness articles for many local corporations and publications. I have experience in conducting supervisory trainings, assisting supervisors in the management of troubled employees, and providing Employee Assistance Program (EAP) orientation trainings to employee groups. I have also assisted in the development and implementation of an outpatient chemical dependency treatment program, and have participated in all phases of the inpatient treatment of drug and alcohol addiction.

In my first career, I performed industrial engineering duties which involved the efficient organization of complex manufacturing procedures. I also acted as liaison between engineering, manufacturing, drafting and quality control departments.
